

**ENMAR MARINE LUBRICANTS**  
**THE ENERGY THAT DRIVES THE WORLD**

# 1. About ENMAR

ENMAR Marine Lubricants is a global brand offering high-performance lubrication solutions for the marine industry. Our products are designed to keep vessels safe, efficient, and reliable in every operational condition — from heavy-duty engines to complex auxiliary systems.

With an active presence in over 600 ports worldwide, ENMAR ensures consistent supply and local support for fleets operating across Europe, Asia, the Middle East and Africa.

**ENMAR stands for performance you can rely on.**

## 2. Our Mission, Vision & Values

To keep ships moving with trust, quality, and advanced lubrication technology.

To become one of the most reliable and trusted marine lubricant brands worldwide — supporting sustainable and safe shipping.

### Values

- High quality performance products
- Partnership — long-term relationships built on trust
- Innovation — solutions driven by technology and experience
- Responsibility — safety and care for people and the sea

“

“ENMAR was created to represent a promise — reliability through quality. Our approach is built on precision, transparency and consistent results. We are not just a brand — we are a trusted partner for the global marine community.”

”

CEO Nerita group Roman Miroshnichenko

### 3. Manufacturing and Quality Assurance

ENMAR marine lubricants are blended and packaged at certified industrial facilities that operate under the highest international standards, including ISO 9001 (Quality Management Systems), ISO 14001 (Environmental Management) and ISO 45001 (Safety Management).

Each lubricant is developed using top-grade base oils and advanced additive packages.

A multi-stage quality control process is implemented at every step of manufacturing, ensuring consistent product quality.

Before delivery, every batch undergoes strict laboratory control

## 4. ENMAR Marine Lubricants product range

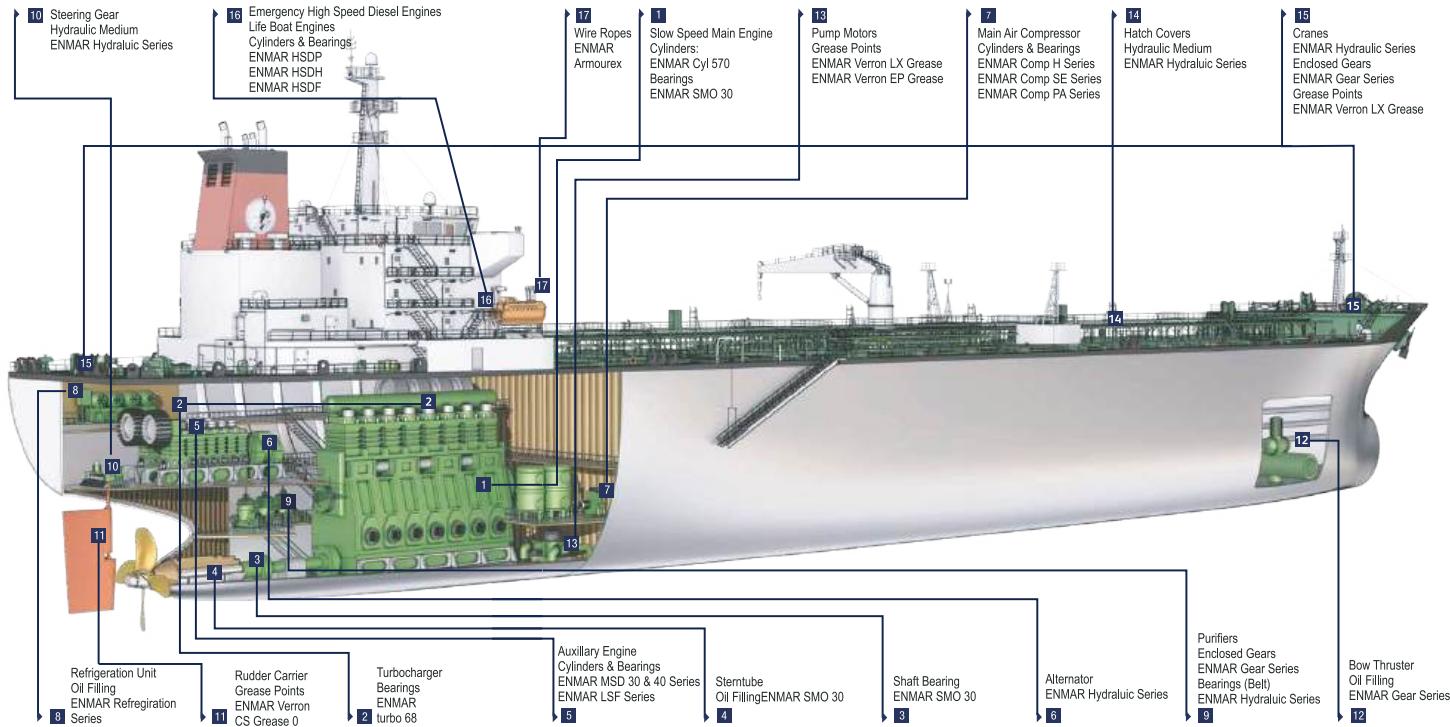

Enmar products are approved by or meets requirements of Leading Equipment Manufacturers (OEMs).

- CYLINDER OIL
- SYSTEM OIL
- TRUNK PISTON OIL
- DIESEL ENGINE OIL
- GEAR OIL
- REFRIGERATION OIL

- HYDRAULIC OIL
- COMPRESSOR OIL
- TURBINE OIL
- HEAT TRANSFER
- STERN TUBE OIL
- GREASES

An extensive product range includes over 40 items of lubricants, greases and technical fluids and meets or exceeds the performance requirements of, or have gained approvals from, key global OEMs.

## 5. International port directory

ENMAR operates through a global network of trusted partners and logistics centers. We deliver marine lubricants 24/7 and provide technical support in every major time zone.

8 production plants around the world

Active presence in global maritime hubs:  
Singapore, Rotterdam, Istanbul, Busan, Panama, and others

## 6. TESS – Technical Equipment Service & Support

TESS is technical support platform designed to maximize equipment reliability and minimize operational risks.

### Each ENMAR TESS Sample Kit contains:

-  Plastic sampling containers
-  Stickers for used oil sample identification and labeling
-  Plastic envelops for post shipping
-  Plastic zip lock bag for sampling containers
-  An instruction

Specialized  
Sample Kits

Assistance in selection and  
compatibility of equivalent products

Live communication  
with technical experts 24/7/365

Lube Charts

Access to customer's personal  
account that holds the lube charts  
and reports with testing results  
of used oil samples

Marine lube samples  
testing in the certified  
independent laboratory

Detailed reports  
on oil condition and  
recommendations for change

## TESS includes

Prompt Analysis onboard

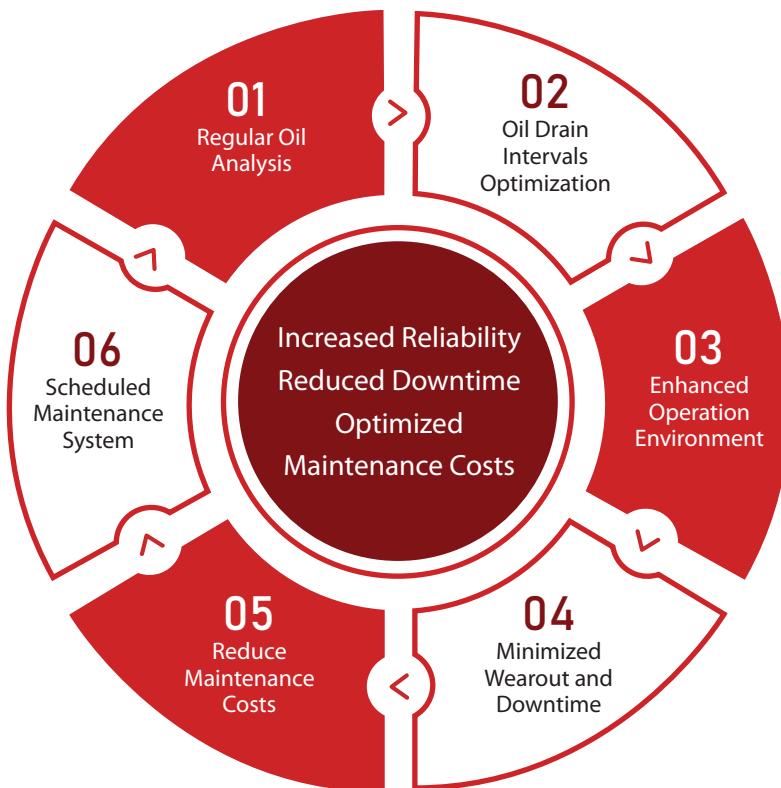

Detailed Analysis onshore

Analysis Results and  
Recommendations in Personal  
Account

## Regular Working Oils Analysis Supports Your Maintenance Activities and Helps You to Make Decisions with Confidence

- Regular oil analysis help to track changes over the time and to prevent excessive wearout.
- Portable testing laboratories enable vessel engineers to quickly analyze oil's most important properties right on board and promptly adjust the maintenance planning.
- TESS enables to monitor changes in equipment performance pattern and to prevent mechanism breakdowns.

## 7. Brend strengths

ENMAR marine lubricants - It is a brand that stands for trust, consistency, and partnership in motion.

### Brand authority:

Proven quality

Technical excellence

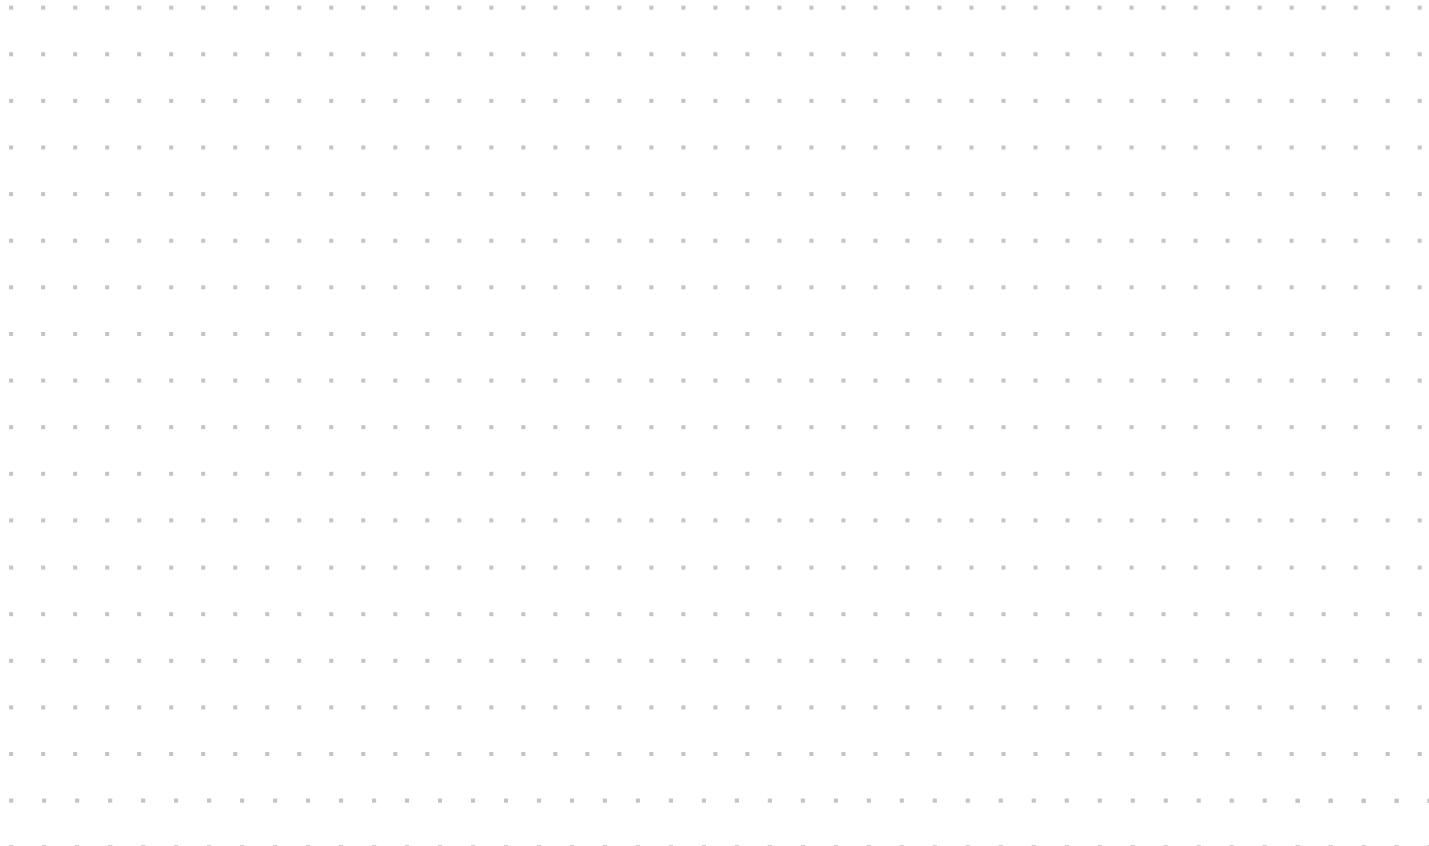

Transparent communication

High-quality performance

# Notes

A blank sheet of dot-grid paper. The page is filled with a grid of small, faint grey dots arranged in horizontal rows. This grid covers most of the page, leaving a white margin on all four sides. The dots are evenly spaced, creating a consistent grid pattern for writing notes.
